

First make sure you have a valid username and password for a customer in the VIP VoIP portal that is paired with an extension. If you do not have one ask your reseller to create one for you. This will be the same username and password you use for the mobile and desktop apps.

Then visit the Chrome web store and search for VIP VoIP

<https://chrome.google.com/webstore/search/vip%20voip?hl=en-GB>

Click on the VIP VoIP Click To Dial Extension and then click Add to Chrome.

Then click "Add extension". We read and change data on websites you visit so that we can generate click to dial links.

Then visit <chrome://extensions/> in Chrome and click "Details" to configure the extension.

VIP VoIP Click To Dial Extension 1.5
Provides click to dial functionality for a VIP VoIP customer.

ID: melhfihkjcojmhoigeacinafnbeidjbm
Inspect views [background page \(Inactive\)](#)

[Details](#) [Remove](#)

Then click "Extension options".

Extension options ✕

Then click "Click here to get your auth codes".

VIP VoIP Click To Dial Extension ✕

Don't have your chrome plugin auth codes? [Click here to get your auth codes.](#)

Auth User ID: [REDACTED] 1

Auth User Secret: [REDACTED] 8

Save

If you do not have the above credentials then please contact your VIP VoIP provider.

The next time you visit a website and hover over a phone number a box will appear with a link in it. If you click that link it will cause your phone to ring. When you answer the call it will then dial out to the number in the link.
